Vyopta Awarded GSA Contract

AUSTIN, Texas – March 29, 2010. Vyopta Incorporated, a premier software developer of video and unified collaboration applications, today announced that it has been awarded a GSA Contract by the United States General Services Administration.

Vyopta's GSA contract includes server based platforms that control video communications workflows and advanced reporting and analytics. "Vyopta's addition of this GSA Contract Schedule allows, federal government procurement officers the opportunity and easy access to a premier solution provider and developer of video communications products that integrates video conferencing into business workflows and processes," says Alfredo Ramirez, president of Vyopta. "Vyopta has developed solutions that leverage video communications to have a greater impact on your organization."

GSA (General Services Administration) is a centralized procurement management agency that maintains a list of approved products and service providers on behalf of federal agencies. GSA facilitates a reliable and easy buying process based on products and services that have been approved for reliability, safety and credibility.
