Vyopta Accepted into Cisco Developer Network

AUSTIN, Texas – September 10, 2010. Vyopta Incorporated, a premier software developer of video and unified collaboration applications, today announced that it has been accepted into the Cisco Developer Network (CDN).

"With acceptance into the CDN, Vyopta can work ensure complete interoperability of our products with Cisco equipment," says Rick Leung, Vice President and CTO of Vyopta. "Getting certification from Cisco will affirm our commitment to developing reliable products that drive the use of video communications in a rapidly evolving market."

The CDN enables Cisco and third-party developers to test interoperability of hardware and software products for business solutions that unify data, voice, video, and mobile communications.

About Vyopta Incorporated

Vyopta Incorporated is a premier software developer of video and unified collaboration applications that improve communication and collaboration, reduce travel and operations costs, enhance customer/patient services, increase workforce productivity and training and boost overall organizational performance.
